Date:

There have been a lot of things happening in this world that have disturbed me, but when an American who has held an important position in our government has been found to be a Russian spy for 18 years and is allowed to resign and leave the country, that is the end.

Now it is charged there are hundreds of security risks in the state department. This certainly is no credit to those who are supposed to safeguard our country. If the power of our state department and CIA are not used to benefit us then we are in trouble.

The newspapers have the power and the responsibility to the public to keep this in the open and not let it be forgotten. If enough people were aroused to action and demanded a full investigation of this mess, we could clean up our CIA and state department.

When we allow known Communists to work in our government, we won't have to wait long before Khrushchev's threats to bury us come true.
